The following is being given to you in conjunction with the New Jersey Department of Protection (DEP). Pesticide Control regulations requires us to provide you with the information contained in this notice regarding pesticides used on your property. No application shall be made until the customer or resident has had the opportunity to review the information. The table below lists the mandatory pesticide label, instructions and precautions which may be used and could affect you for the pesticide(s) we will use on the proposed date of application.

Pesticides are a controlled substances used to control living organisms and vary in degree of toxicity. Sanitation, as well as physical and biological control measures, should be considered as another part of a good pest control program. During any application of pesticides humans and pest should not contact treated surface until the spray has dried.

No application should begin unless all pre-application instructions and precautions are followed. If any of the information in the table below changes, we will issue a new Consumer Information Notice reflecting that change.

You are entitled by the New Jersey Pesticides Control Regulations to request and receive from us the specific label for each pesticide that will be used on your property. Furthermore, if this is a contract for termite control (using pesticides other than termite baiting systems) we are required to give you a copy of a summarization of the regulations regarding prior applications of termiticides. (N.J.A.C. 7:30-10.4).

We are also required to provide the following phone numbers for your use in the event you have questions concerning the materials that we will be using.

National Pesticide Information Center (general health and toxicology info.)	1 (800) 858-7378
New Jersey Poison Information & Education Systems (Emergencies)	1 (800) 222-1222
New Jersey DEP Pesticide Control Program	1 (800) 984-6507
<i>(This number is for pesticide regulation information, complaints & health referrals)</i>	

Upon your request, we will inform you of the exact dates of pesticide application before the application takes place.

Proposed Date of Application: _____ Alternate date: _____

BRAND NAME	COMMON NAME	BRAND NAME	COMMON NAME

During any application of pesticides humans and pets should not contact treated surface until the spray has dried. Cover and remove all food and food processing equipment during application if necessary. Food processing equipment and food contacting surfaces should be washed following application if the pesticide has contacted them. Ventilate the area following treatment. Do not reenter areas treated with application until advised by the applicator.

As the customer, I acknowledge that Williams Pest Services, Inc. has provided me, in writing, all the information required by the NJ DEP Pesticide Control Program's notification program.
