

# FLEA TREATMENT PREPARATION FORM

## ▶ PREPARATION IS NECESSARY PRIOR TO TREATMENT

The following steps MUST be performed:

1. Pets MUST be professionally groomed and treated for fleas the SAME DAY & TIME the treatment is performed.
2. Remove all toys, decorative items, pillows, and other items off the floors so ALL areas of the floor can be treated.
3. Remove all articles from under beds, on closet floors and under furniture.
4. Vacuum thoroughly paying special attention to:
5. Chair and couch cushions
  - ▶ All wall-floor and floor-furniture junction
  - ▶ Under beds
  - ▶ In closets
  - ▶ Under furniture
6. Remove the vacuum bag, and place in a plastic bag and seal. For canister vacuum's without a bag, empty into a plastic bag and seal. Then, take it outside and discard in the trash.
7. Clean non-carpeted areas with soap and water.
8. Clean thoroughly ALL areas frequented by pets. Ex: table-tops, refrigerator tops, window sills, counters, etc. Wash, dry-clean or destroy all pet bedding.

## ▶ SPECIAL NOTES:

- ▶ Before treatment, remove birds, fish and other pets, from the residence. If the fish cannot be removed, disconnect the air pumps and cover the tanks with plastic sheeting and secured tight. The treatment will not harm houseplants.
- ▶ After initial treatment only, all persons and pets must stay off the floors and upholstered furniture for at least four hours to make sure treated surfaces are dry.
- ▶ The materials used are all EPA-registered. Treatment is considered safe and effective, when they are applied according to the label directions and are completed by a licensed service professional.

## ▶ TO BE DONE AFTER A FLEA TREATMENT

1. VACUUM!!! VACUUM!!! VACUUM!!! You cannot vacuum enough.
2. Keep pet(s) bedding clean.

A hatching may occur 7-10 days after treatment; therefore, a follow-up service is automatically scheduled. This is normal they will die. VACUUM!!!

**NO ONE, including pets, may be in the residence during treatment or for 2-3 hours after treatment.**
