

PREPARATION FOR FLEA TREATMENT
VIEW/PRINT LABELS ON OUR WEBSITE:
SWEENEYSPEST.COM

- 1.) Treat all pets with Frontline or Advantage. Over the counter products are not acceptable.
- 2.) Everything movable must be picked up off the floors, except area rugs.
- 3.) Vacuum all carpeted and solid flooring the day of the service, before treatment is done. After vacuuming, replace vacuum cleaner bag with a new bag. Take old bag out of the house and put into something airtight. Fleas can live in the old bag and jump back out.
- 4.) All pets, birds, and people must be out of the house for at least three hours after the treatment is done. Fish tanks and unmovable reptile cages must be covered. Turn on all fans and open windows to shorten the drying time.
- 5.) Vacuum all carpets and solid flooring once a day for a minimum of five days, after treatment with the new bag. Do not mop floors for at least 48 hours after treatment.
- 6.) Call us at (607) 749-8455 if fleas are still present after 5 days. Retreating cannot be done for 7 days.

IMPORTANT: If any of these directions are not followed, warranty will be null and void.
