

Candidate Lakes for Artificial Rafts

This list is based on preliminary screening from Maine Audubon Loon Count data that indicates repeated low productivity over the last five years. Additional lakes may be added to this list if local knowledge of nesting pairs indicates low productivity. All lakes must be fully vetted before a raft plan is approved. **Launching rafts on a lake that already has productive loon pairs does more harm than good and should not be attempted.** See contact list below to get additional information.

Alford Lake	McCurdy Pond
Allen Pond (Greene)	McGrath Pond
Androscoggin Lake	Megunticook Lake
