

## **Whole House Generators**

When installing a whole house generator, you are required to obtain the following:

- Electrical Permit
- Gas Permit
- Zoning Permit
- Public Health Review Application (if applicable)

The following supporting documentation is also required:

- Site Plan in accordance with the Bolton Zoning Regulations
- License for Contractor
- Worker's Comp Insurance or Exemption Form
- Load Calculations
- Line Diagram for wiring (how it gets power from generator to inside of house)
- Information on the generator
- 15 minute load test when installed
- Information on the transfer switch and if rated for service equipment (automatic or manual)

## **Portable Generators**

Only an Electrical Permit needs to be obtained for interlock devices and generator connections to power system. If a contractor is being used, you will need to get their license and worker's comp insurance or a waiver form.
