REGULATIONS FOR SECOND METER FOR IRRIGATION

Residents are permitted to purchase a second water meter that will allow for separate metering for **outdoor water use only**. The secondary meter is known as an "irrigation meter". Water consumption through the irrigation meter will be billed for water only and NOT include a sewer use charge. To install an irrigation meter to measure such use, the following regulations shall apply:

- 1.) You must make your own arrangements with a licensed plumbing contractor for the installation of an irrigation meter. Once you have selected a licensed plumbing contractor he/she will need to apply for a plumbing permit online at www.revere.org/permitting .
- 2.) Once a permit is issued, an irrigation meter can be purchased in the Water Office located at 281 Broadway. The cost of the outdoor irrigation meter is \$170.00.
- 3.) All irrigation water meters must be installed according to the proper configuration which you can find attached. Once installed, an appointment with a City of Revere Water Meter Technician will be required to install a modular transmitting unit (MTU). At this time, all irrigation water meters must be inspected by Water Meter Technicians. **This is in addition to an inspection required by the plumbing inspector.**
- 4.) Outdoor water rates will **ONLY** apply after the Water Meter Technicians have inspected and approved the installation of the outdoor water meter and (MTU).
- 5.) If a water meter installation is found to be tampered with or altered with after the final inspection at any time, all credits will be null and void, and the homeowner(s) will be charged for sewer use on all water consumed through the water meter.

For additional information please visit: www.revere.org and link to Water & Sewer Billing Home Page.
