GreaterAugustaUtilityDistrict.org

Dear Customer,

We're proud of our progress this year in all our services, especially stormwater:

- We completed design of a final tank to capture sewage that currently goes into the Kennebec River during major rain events—what's called Combined Sewer Overflows (CSOs). It's a critical part of our ongoing efforts to comply with DEP stormwater regulations. Since 1989, the District has reduced CSOs by 90%.
- Our Stormwater Work Group convened to determine the most equitable way to allocate the costs of improved stormwater management.

We look forward to serving you in 2019, and thank you for your support!

—The GAUD Team

TIME TO PROTECT YOUR OUTSIDE FAUCETS

With winter right around the corner, make sure your pipes aren't vulnerable to freezing and bursting.

The first things to do: close basement vents and insulate exposed outdoor faucets. Here's a complete guide to keeping pipes from freezing:
