

# CONSTRUCTION NOTICE:

FOR RESIDENTS OF CONY ST,  
BANGOR ST, NOYES ST PL  
& SURROUNDING AREAS

## IN JUNE, WE'RE STARTING A VITAL CONSTRUCTION PROJECT TO REPLACE OLD WATER MAINS IN THE FOLLOWING AREAS BEFORE THEY FAIL:

- Cony St between Willow St and Cony Circle, with connections to Arsenal St
- Through Cony Circle with connections to Bangor St and Stone St
- Cony St between Cony Circle and Gannett St with connections to Morse St and Gannett St
- Water and sewer main replacement on Noyes St Pl

We will notify customers in advance of any temporary service disruptions.

This project will improve the safety, reliability and quality of the infrastructure in your area.

**See reverse for more details about this important project.**

*◀ During an emergency water main repair,  
we discovered a pipe date-stamped 1887!*

## DETAILS ON THE GREATER AUGUSTA UTILITY DISTRICT'S UPCOMING WATER MAIN CONSTRUCTION PROJECT

We have developed a detailed traffic control plan, in coordination with the City of Augusta, to keep roads accessible throughout the project.

The contractor, St. Laurent & Son of Lewiston plans to start work in early June. They will coordinate access and disturbances to driveway entrances directly with each homeowner. Note that portions or all of the work may be performed at night depending on City of Augusta requirements.

The District's representative and contractor will observe current CDC COVID-19 guidelines.

For questions about the project, call our project representative, Michael Morey, at **(207) 622-3701** or email [ConyStreet@GAUD.ws](mailto:ConyStreet@GAUD.ws). The emergency after-hours contact is the City of Augusta's dispatch center at (207) 626-2370, which will contact the District's on-call person. Visit [Sites.Google.com/GreaterAugustaUtilityDistrict.org/Cony/](https://www.google.com/GreaterAugustaUtilityDistrict.org/Cony/) for updates.

If you are a property manager/landlord, please distribute this information to all residents of affected buildings.

**We appreciate your patience as we work to replace the antiquated mains as quickly and safely as possible!**
