Greater Augusta  
Utility District

Water | Wastewater | Stormwater

2022 has been another very busy year for all of us at Greater Augusta Utility District. We pride ourselves on delivering high quality, safe drinking water, while protecting our environment and the Kennebec River. We delivered 635 million gallons of drinking water (1.7 million gallons per day) and effectively treated over 1.4 billion gallons of waste and stormwater (3.9 million gallons per day). In addition, this year we have received over \$7 million in grants to help us be one of the most productive and transparent utility districts in Maine.

None of this would be possible without our amazing and committed staff, and of course, you, our customers, who expect nothing but the best and safest drinking water every day, 365 days a year.

So as we celebrate the Holidays, all of us at Greater Augusta Utility District say thank you for giving purpose to our daily work. We wish you all a safe and prosperous new year.

*Happy Holidays*
