

Proteome Sciences plc (www.proteomics.com) is a London (UK) and Frankfurt (Germany) based global leader in applied proteomics and peptidomics. We partner with innovative companies and academic research groups offering high sensitivity, proprietary technologies for protein and peptide biomarker discovery, validation and assay development. Currently, we are seeking to fill the role of a

Project Manager (m/f/d)

at our German site in Frankfurt/Main. This is a expert role reporting to the CEO requiring an ability to operate at all levels of the organization to ensure high efficiency and timely delivery of projects. The Project Manager is involved in planning and management of all research and contract service projects, as well as maintaining good relationships with the Operational Teams, Finance Director, the CSO, Sales Team and Customers. S/he should coordinate documentation of project plans and reports. The Project Manager supports the Head of Operations for operational resource allocation as well as post-project cost analysis. S/he will liaise with the Compliance functions to ensure adherence to the internal Quality Management System and Good Clinical Laboratory Practice (GCLP) where appropriate.

In detail, your responsibilities will include:

- Planning of internal and external projects
- Simultaneous management and coordination of multiple projects and their documentation
- Ability to work independently and take accountability for ensuring timely delivery
- Awareness of project-related costs and the impact on delivery times and quality
- Reporting of variances to the plan
- Fulfillment of stringent documentation requirements
- Ability to integrate the needs of various departments and stakeholders
- Effective dealing with conflicts during project execution and finding solutions in a consensus-oriented way

Who you are:

- You hold a degree in natural sciences.
- You have at least 3 - 5 years experience in a Project Management role
- Good interpersonal skills and ability to positively motivate and influence across different functional groups and levels of the organization
- You have strong customer focus and appreciation of requirements for delivering high quality results
- Excellent oral and written communication skills in English

What we offer:

- Employment at one of the market leaders in the area of applied proteomics, peptidomics and proteomic biomarker development
- A competitive remuneration package commensurate with our business sector
- An exciting and interesting work environment with dynamic projects
- A friendly and welcoming working atmosphere

- Flat hierarchies and an open-minded company structure
- Opportunity to grow within a developing company
- An attractive location at the border of Frankfurt with good access to public transport

We are an equal opportunity employer and we value diversity. We comply with all applicable equal employment opportunity legislation and all employment is decided on the basis of qualifications and business need. Candidates need to have the right to work in Germany and must be willing to relocate to the Frankfurt a.

M. area.

In the first instance, candidates are encouraged to contact Dr. Josef Schwarz on +49 (0)69/50986-700.

Please send your documents (cover letter, CV) as a PDF to:
