

Proteome Sciences plc is a London (UK) and Frankfurt (Germany) based global leader in applied proteomics and biomarker research. We partner with innovative companies and academic research groups offering high sensitivity, proprietary technologies for protein and peptide biomarker discovery, validation and assay development.

We are looking for a highly creative and motivated

**(Junior) Scientist - Mass Spectrometry (m/f/d)**

to join our Mass Spectrometry team based in Frankfurt am Main, Germany.

As a (Junior) Scientist in the Mass Spectrometry Team, you will be involved in client proteomics projects conducted in our laboratories, as well as in internal research and development efforts. You will be part of a highly collaborative team of scientists and contribute to our mission of bringing high quality proteomics analyses to an ever-growing international client base.

We strive to operate at the forefront of technology and routinely incorporate new technologies into our constantly expanding portfolio of services.

Key duties and responsibilities will include:

- Daily operation, quality control and troubleshooting of mass spectrometry and liquid chromatography equipment.
- Development and implementation of LC-MS methods for both multiplexed discovery approaches as well as targeted analyses.
- MS data analysis and interpretation
- Close collaboration with an interdisciplinary team of scientist in a project-centric environment
- Contribution to client communication in the form of data presentations and reporting.

Who you are:

- Postgraduate level training in biology, biochemistry, chemistry or related fields.
- Hands-on experience in the operation and maintenance of mass spectrometry and LC equipment (ideally Orbitrap-based, additional systems will be considered a plus)
- Experience in the design, analysis and interpretation of (multiplexed) proteomics experiments
- A solid grasp of the entire proteomic workflow including sample preparation and bioinformatic analysis.
- An open-minded, flexible personality and can-do problem-solving attitude with the ability to communicate efficiently in cross-functional teams
- A good command of English both spoken and written.

What we offer:

- Employment at one of the market leaders in the area of applied proteomics, peptidomics and proteomic biomarker development
- A competitive remuneration package commensurate with experience
- An exciting and challenging work environment with highly dynamic project contexts and requirements.
- A friendly, welcoming and respectful working atmosphere
- Flat hierarchies and an open-minded company structure
- Opportunities to grow within a developing company
- An attractive location at the border of Frankfurt with good access to public transport

We are an equal opportunity employer and we value diversity. We comply with all applicable equal employment opportunity legislation and all employment is decided on the basis of qualifications and business need. Candidates need to have the right to work in Germany and must be willing to relocate to the Frankfurt a. M. area.

Please apply with a CV and Cover Letter, outlining your motivations for the application at [careers@proteomics.com](mailto:careers@proteomics.com). For informal enquiries you are encouraged to contact Juliane Weißer, PhD at +49-(0)69-50986-700.
