

Proteome Sciences plc is a London (UK) and Frankfurt (Germany) based global leader in applied proteomics and biomarker research. We partner with innovative companies and academic research groups offering high sensitivity, proprietary technologies for protein and peptide biomarker discovery, validation and assay development. We are looking for a highly creative and motivated

Scientist / Senior Scientist Mass Spectrometry (m/f/d)

to support our Mass Spectrometry team based in our ISO9001:2015 certified facility in Frankfurt am Main, Germany.

As a Scientist / Senior Scientist in the Mass Spectrometry Team, you will be involved in all client proteomics projects conducted in our laboratories, as well as in internal research and development efforts. You will be part of a highly collaborative team of scientists and contribute to our mission of bringing high quality proteomics analyses to an ever-growing international client base.

We strive to operate at the forefront of technology and routinely incorporate new technologies into our constantly expanding portfolio of services.

In detail, your responsibilities will include:

- Daily operation, quality control and troubleshooting of mass spectrometry and liquid chromatography equipment in interaction with technical personnel in the MS team.
- Development and implementation of LC-MS methods for both multiplexed discovery approaches as well as targeted analyses.
- Daily interaction with scientists from neighboring departments to customize the approach depending on project requirements.
- Supporting the Head of MS in the management of group resources and capacity planning to ensure a timely delivery of client projects within the allocated budget.
- MS data analysis and close collaboration with the Bioinformatics team, suggesting and exploring novel ways of analyzing and interpreting MS data.
- Technical consulting and contribution to client communication in the form of project proposals, data presentations and reporting.
- Implementation and management of requirements and procedures of the department in accordance with ISO9001: 2015 or required by GCLP
- Depending on experience project management of customer projects

Who you are:

- You hold a PhD degree in biology, biochemistry, chemistry or related fields. Post-doctoral experience would be appreciated, but we would as well offer the chance for personal development.
- You have hands-on experience in the operation and maintenance of mass spectrometry and LC equipment (ideally Orbitrap and other MS Thermo Fisher instruments or experience with instruments from other vendors)
- Experience in the design and conceptualization of multiplexed proteomics discovery experiments, also including the analysis of post-translational modifications or
- Experience in the development of targeted SRM and PRM methods for peptide analytes. Additional experience in the analyses of metabolites and small molecules will be considered a plus

- You have an open-minded, flexible personality and can-do problem-solving attitude and you communicate efficiently in cross-functional teams as well as in front of clients
- Experience working in a regulated environment
- Initial experience in managing scientific projects / collaborations will be an advantage
- You have a good command of English both spoken and written.

What we offer:

- Employment at one of the market leaders in the area of applied proteomics, peptidomics and proteomic biomarker development
- A competitive remuneration package commensurate with experience
- An exciting and challenging work environment with highly dynamic project contexts and requirements.
- A friendly, welcoming and respectful working atmosphere
- Flat hierarchies and an open-minded company structure, where your voice will be heard and you can put your ideas into practice.
- An attractive location at the border of Frankfurt with good access to public transport

We are an equal opportunity employer and we value diversity. We comply with all applicable equal employment opportunity legislation and all employment is decided on the basis of qualifications and business need. Candidates need to have the right to work in Germany and must be willing to relocate to the Frankfurt a. M. area.

In the first instance, candidates are encouraged to contact Dr. Josef Schwarz on +49 (0)69/50986-700.

Please send your documents (cover letter, CV) as a PDF to:
