

MOTORCYCLE SAFETY

Always wear safety gear.

Even if it is not required by state law, it is crucial to wear a helmet to prevent head injuries if an accident occurs.

Be visible.

Use your headlight day and night so you are easier to see.

Give yourself space.

Drive defensively by giving yourself time and distance to account for other motorists' driving.

Stay in your lane.

Make sure to remain in your lane. Do not weave in and out of lanes.

Watch the weather.

When riding, make sure you have a plan of action if bad weather occurs.
