

ASSIGNMENT OF STUDENTS TO CLASSES

It is the policy of Mt. Blue Regional School District that each student shall be placed at an academic level which challenges the student and in which the student can achieve success with the appropriate effort.

It is the responsibility of the building principal to initiate a procedure which will assure that each student is appropriately placed. It is expected that the principal will involve both guidance and teaching personnel in the procedure to insure proper placement.

Principals will make a reasonable effort to inform the parents of the course selections of their children, and parent involvement will be encouraged in planning each child's academic program.
